Hey Paul –

Given Rick is feeling under the weather the past couple days and this would need to go to you anyhow, forwarding over. They are currently at our layer. Please see below for my work up and recommendation. Let me know if approved flat renewal.

BDA has the following up on Side A:

- $10M po $100M xs $350M
- $5M po $50M xs $450M

I don't believe this should change our stance, especially on the ABC.

Thanks,
Tiago

Subject: Ford Motor Company - Renewal Authority Request 12/15/2025

Hey Rick -

Working on the renewal for Ford. Working with Jessica Levins. She has received the primary quote last night as flat. She is also looking for our layer to come in flat. We have three layers up on Ford which I have outlined below.

We have a large relationship with the client which decreased from $18m to $12m this year. I reached out to Lynn Richardson, the CE, to get more information see below:

- Stopped writing property due to $20m loss.
- Getting off excess casualty, have been decreasing limits YoY. Next year will be the last year.
- Cyber is a -7.5% decrease this year.
- A lot of the premium was due to construction of their new factory in Kentucky

Oddly we have a UW call scheduled in 2 weeks but they already began building the tower. I want to get the conversation going here incase they reach out layer before the UW call. Company has a lot going on. Layoffs and cutting production in EV to focus on Gas and Hybrid. However, I suggest okay to renew, subject to UW call. STM is 78%. Co-Pilot suggest decline. I will not provide a quote until I receive the underlying quotes.

Something to note – the CE Relationship amount is $2m higher than what the ART tool says. Not sure where the discrepancy is.

Tariffs had a significant impact on Ford Motor Company's financial performance in 2025. The company absorbed a net tariff headwind of $700 million in the third quarter alone, which affected adjusted EBIT results despite otherwise strong operational performance. For the full year 2025, the net tariff impact is expected to be $1 billion, a reduction from the previously expected $2 billion due to recent policy changes that allow Ford to offset more of its auto parts tariffs with credits based on U.S. manufacturing volume. This change, enacted by a proclamation in late Q3, enabled Ford to record a $1 billion benefit as a receivable in Q4, which more than offsets the tariff costs for that quarter and results in the $1 billion net impact for the year.

Looking ahead to 2026, Ford expects the net full-year tariff impact to be similar to 2025, as the improvements in policy are now fully incorporated into their cost assumptions. The remaining exposure primarily relates to tariffs on steel, aluminum, certain auto parts, and vehicle import tariffs not offset by U.S. content credits. The company's ability to manage these headwinds is enhanced by its large U.S. manufacturing footprint, which allows for greater utilization of available offsets. Tariffs continue to be a dynamic factor in Ford's cost structure and guidance, but recent developments have reduced their overall burden and provided greater clarity for financial planning

About the company:

- Ford Motor Company develops, delivers, and services Ford trucks, sport utility vehicles, commercial vans and cars, and Lincoln luxury vehicles worldwide. It operates through Ford Blue, Ford Model e, Ford Pro, and Ford Credit segments. The company sells Ford and Lincoln internal combustion engine and hybrid vehicles, electric vehicles, service parts, accessories, and digital services for retail customers, as well as develops software. It also sells Ford and Lincoln vehicles, service parts, and accessories through distributors and dealers, as well as through dealerships to commercial fleet customers, daily rental car companies, and governments. In addition, it engages in the vehicle-related financing and leasing activities to and through automotive dealers. Further, the company provides retail installment sale contracts for new and used vehicles; and direct financing leases for new vehicles to retail and commercial customers, such as leasing companies, government entities, daily rental companies, and fleet customers. Additionally, it offers wholesale loans to dealers to finance the purchase of vehicle inventory; and loans to dealers to finance working capital and enhance dealership facilities, purchase dealership real estate, and other dealer vehicle programs. The company was incorporated in 1903 and is based in Dearborn, Michigan.

- Ford Motor Company reported robust financial performance for the third quarter of 2025, with global revenue reaching $50.5 billion, setting a new record for the company. This result represented over 9% growth year-over-year, outpacing the company's wholesale growth by roughly 1.5 times, indicating strong pricing power and favorable product mix. Adjusted EBIT for the quarter remained steady at $2.6 billion, even as the company absorbed a significant net tariff headwind of $700 million. The durability of Ford's business is highlighted by the diversification of revenue streams, both geographically and across product and service segments, with notable growth in software and physical services EBIT, which increased by more than 20% over the past three years. Cost improvements and operational efficiency also played a significant role, with a net $1 billion cost reduction expected for the year, excluding tariffs, due to lower material costs, freight savings, and warranty improvements. Warranty costs in particular saw a year-over-year decrease of $450 million, reflecting the success of quality initiatives and operational discipline. Ford ended the quarter with a strong balance sheet, holding nearly $33 billion in cash and $54 billion in liquidity, reinforcing its competitive position and supporting ongoing capital allocation strategies, including shareholder dividends and continued investment in new product platforms. Segment performance was led by Ford Pro, which posted $17.4 billion in revenue and $2 billion in EBIT with double-digit margins, driven by volume growth and continued cost improvements. Ford Model e saw revenue and volume growth from new European products, but losses increased due to lower net pricing and higher investment in next-generation vehicles, with a year-to-date loss of $3.6 billion primarily attributed to first-generation EVs and new platform investments. Ford Blue achieved $1.5 billion in EBIT, with strong revenue growth offset somewhat by higher costs from tariffs and adverse currency exchange. Ford Credit contributed positively with over $600 million in EBT, up 16% year-over-year, reflecting improved financing margins and a high-quality loan portfolio. Overall, Ford's performance was underpinned by disciplined execution, cost containment, product strength, and strategic adaptation to evolving market and regulatory conditions, although near-term challenges such as tariffs and the Novelis supply disruption have tempered full-year guidance for 2025. Nevertheless, the company is tracking at the high end of its original EBIT guidance, demonstrating resilience and adaptability in a

dynamic industry environment

Management:

- James Duncan Farley Jr. - President, CEO & Director - James Duncan Farley, Jr. also known as Jim, serves as President, Chief Executive Officer and Director at Ford Motor Company since October 1, 2020. He served as Chief Operating Officer at Ford Motor Company since February 2020 until 2020. Mr. Farley served as President of New Businesses, Technology & Strategy at Ford Motor Company since May 01, 2019 until 2020. He was Executive Vice President and President of Global Markets at Ford Motor Company until May 01, 2019 and served as its President of Europe, Middle East & Africa since January 01, 2015 until June 1, 2017. He served as an Executive Vice President of Global Marketing, Sales & Service at Ford Motor Co. from 2007 to January 1, 2015. In this role, he led Ford's drive to connect more closely with customers through integrated global marketing, advertising, digital communications, brand development and research. He also was instrumental in leading the ongoing transformation of Lincoln, setting it on a path for growth as a world-class luxury brand and customer experience. His achievements at Ford include improving overall operational fitness of its marketing and sales operations, his work to globally align the brand and integration of the global marketing and sales team. In addition, he was instrumental in positioning Ford's operations in Canada, Mexico and South America for continued future growth and leading the reinvention of the Lincoln brand, which included the launch of the all-new Lincoln MKC and Lincoln's introduction in China. He served as a Group Vice President of Global Marketing Sales & Service at Ford Motor Company from August 01, 2010 to December 01, 2012.
- William Clay Ford Jr. - Executive Chairman - William Clay Ford, Jr., also known as Bill, is a Founder and Partner of Fontinalis Partners, LLC He is involved in Portfolio development and he helps expand Fontinalis' strategic and financial relationships across the venture and mobility ecosystems. He is an Owner and Vice Chair of DLI Properties L.L.C. Mr. Ford is also a Member of the firm's investment team, where he is responsible for a variety of different functions across the investment process, including sourcing and evaluating investment opportunities, conducting due diligence, collaborating with portfolio companies on various financial and strategic initiatives and aiding Fontinalis' internal operations and business strategy. Mr. Ford has been Executive Chairman of Ford Motor Company since September 2006 and served as Chairman of the Board since January 01, 1999.
- Sherry Ann House - Chief Financial Officer - Sherry Ann House has been Chief Financial Officer of Ford Motor Company since February 6, 2025. She served as Chief Financial Officer at Lucid Group, Inc. since May 2021 until December 12, 2023. Ms. House served as the Treasurer & Head of Investor Relations at Waymo LLC, an autonomous vehicle technology company, from July 2020 to April 2021, the Director of Corporate Development from January 2019 to June 2020 and the Director of Business & Corporate Finance from August 2017 to January 2019. Prior to Waymo, she served as Vice President of Corporate Development at Visteon Corporation, an automotive electronics supplier, from December 2016 to August 2017 and as Managing Director at Deloitte Corporate Finance LLC, a global professional services firm, from November 2014 to December 2016 and as Senior Vice President from May 2011 to November 2014.
- Steven P Croley - Chief Policy Officer & General Counsel - Partner of Latham & Watkins LLP since January 2017. He is Chief Policy Officer & General Counsel of Ford Motor Company since July 2021. In this role, he heads the company's world-class teams influencing and advancing progress in areas like technology, trade and sustainability amid rapid transformation in transportation. From 2014 to 2017, Croley served as general counsel for the U.S. Department of Energy. He spent the previous years in the White House, first as special assistant to President Barack Obama for regulatory policy, then as deputy counsel overseeing legal policy.

Board of Directors:

- The board consist of 16 individuals (one more than last year). Average Tenure of the board is 8yrs, 5mths. Shortest Tenured individual of the board is Adriana Cisneros (1yr, 3mths). Adriana Cisneros is Independent Director of Ford Motor Company from July 11, 2024. Ms. Cisneros has been an Independent Director of Mattel, Inc. since August 13, 2018. Ms. Cisneros joined the Mattel, Inc. on August 13, 2018. She has extensive global business, media and entertainment experience. She has been the founding Co-Chair since 2013 of Endeavor Miami. She is also on the Advisory Board Member of Wyncode and TheVentureCity. Longest Tenured individual on the board is William Clay Ford Jr. (26yrs, 9mths).

Merger and Acquisition:

- In the third quarter of 2024, Ford entered into an agreement to sell 100% of its equity interest in Ford Motor Company A/S ("Denmark"). The entity was classified as held for sale in the fourth quarter of 2024, meeting all necessary criteria at that time. As of December 31, 2024, Ford reported $52 million of held-for-sale assets (including $47 million of cash) and $33 million of held-for-sale liabilities related to this transaction in "Other assets" and "Other liabilities," respectively. The company determined that these assets were not impaired prior to sale. The sale of Denmark was completed on January 2, 2025, and the consideration received approximated the carrying value of Denmark at the time of sale, indicating no material gain or loss from the transaction

Revolver:

- As of September 30, 2025, Ford Motor Company had $23.6 billion in total committed credit lines (excluding Ford Credit), with nearly all amounts available except $2.4 billion utilized under local facilities, and key maturities ranging from April 2026 to April 2030, plus a fully drawn £1 billion term loan maturing July 23, 2032.

Litigation:

- Per most recent 10Q or 10K:
  - Nothing Material
- Per SCAC:
  - Filing Date: August 08, 2024 - ONGOING
    - The Complaint alleges that throughout the Class Period, Defendants made materially false and/or misleading statements, as well as failed to disclose material adverse facts about the Company's business, operations, and prospects. Specifically, the Complaint alleges Defendants failed to disclose to investors: (1) that the Company had deficiencies in its quality assurance of vehicle models since 2022; (2) that, as a result, the Company was experiencing higher warranty costs; (3) that the Company's warranty reserves did not accurately reflect the quality issues in vehicles sold since 2022; (4) that, as a result, the Company's profitability

was reasonably likely to suffer; and (5) that, as a result of the foregoing, Defendants' positive statements about the Company's business, operations, and prospects were materially misleading and/or lacked a reasonable basis. Plaintiff filed a corrected Complaint on August 12, 2024. On November 26, the Court issued an Order consolidating cases. All future docketing was ordered to be done in the lead case 24-CV-12080.

- Per Loss Runs:
  - August 09, 2024 - Complaint for violation of Federal Securities Law - This is a class action on behalf of persons and entities that purchased or otherwise acquired Ford securities between April 27, 2022 and July 24, 2024, inclusive (the "Class Period"). Plaintiff pursues claims against the Defendants under the Securities Exchange Act of 1934 (the "Exchange Act") - Vincent Ciampi
    - This is a Federal securities class action filed on behalf of persons and entities that purchased or otherwise acquired Ford securities between April 27, 2022 and July 24, 2024 inclusive ("Class Period"). The suit was prompted by an after market announcement as to 2nd quarter 2024 financial results, revealing that the Company's profitability was affected by an increase in warranty reserves and higher warranty costs. As a result, the Company also revised its outlook for full year earnings for its electric vehicle segment to reflect higher warranty costs then originally planned. Analysts and journalists, including the Associated Press and The Washington Post reported that in the second quarter, warranty and recall costs totaled $2.3 billion, $800 million more than the first quarter and $700 million more than a year prior. On the news, Ford's share price fell $2.51/share or 18.36% to close at $11.16/share. Plaintiffs allege that throughout the Class Period, defendants made materially false and/or misleading statements as well as failed to disclose material adverse facts about the Company's business operations, and prospects. Plaintiffs assert defendants failed to disclose: 1) that the Company had deficiencies in its quality assurance of vehicle models since 2022; 2) that, as a result, the Company was experiencing higher warranty costs; 3) that the Company's warranty reserves did not accurately reflect the quality issues in vehicles sold since 2022; 4) that, as a result, the Company's profitability was reasonably likely to suffer; and 5) that, as a result of the foregoing, defendants' positive statements about the Company's business operations, and prospects were materially misleading and/or lacked a reasonable basis.
      - I have reached out to Vincent for an update. Last year, given the $25M retention, he did not expect this to impact our layer.
